Are you looking for the world class design and innovative technology of KIOSK?

K-KIOSK is a firm that offers general services regarding the KIOSK System, from design and manufacture of external cases to development of KIOSK contents and solutions. We endeavor to satisfy clients' requirements on our products and services as IT environment is changing rapidly.

▲ The corporate lab of K-KIOSK promotes new ideas for innovation and next-generation technical development, encouraging long-term leadership of our firm.

We offer you an opportunity to experience a wide range of products and manufacturing technologies at the KIOSK show room.

K-KIOSK has a SHOW ROOM that enables users to directly experience and view the simulation of our products, offering a pre-design/product development method to KIOSK users. The conventional way of purchasing products through a website has been supplemented, which provides show room visitors with an upgraded service.

▲ Show Room

Technology surpasses our dream... Towards the value of challenge & innovation!! We, K-KIOSK, are here with you to make it come true.

K-KIOSK obtained international standard certificates that meet the overall requirements of quality and environmental control system on design/manufacturing of KIOSK and touch screens and development of web programs from the ICR (International Certification Registrar) ISO9001/14001 - Quality & Environmental Control System

K-KIOSK ADA Compliant

The Korean Anti-Discrimination and Remedies for Persons with Disabilities Act (Partially Amended: 2010.05.11 No. 10280) When adopting and installing the KIOSK System at public institutions and companies in Korea, the following laws and regulations must be complied with.

We, K-KIOSK, conform to the American ADA as well as the Korean Anti-Discrimination and Remedies for Persons with Disability Act. Considering the case in which wheelchairs are placed near the KIOSK, it shall meet the ADA guideline on ATM range and maximum height.

Metal keyboard

If a client wishes to install a keyboard, K-KIOSK shall in principle install a metal keyboard. Any public and industrial PCs and factory-made KIOSK shall be easily installed, and it is composed of a trackball and a touchpad type.

As it is made of stainless steel materials, it is highly sophisticated in terms of its texture and visual appearance. It is also resistant to water, dust and destruction, and since its surface is smooth it is easy to remove any pollutants with a wet cloth. Moreover, a keyboard life test was conducted to improve durability as it may be operable for a long period time.

K-KIOSK Overseas Export (As of 2012.07)

KORYO KIOSK is famous for its brand, K-KIOSK abroad. With its vision to produce the world class KIOSK, we secured 8 resellers across the continents in 2013 and built storage warehouses. We aim to realize sustainable growth through inland transit of our products to overseas clients, and hope that K-KIOSK shall be able to contribute in enhancing the status of our country in the world.

Product Dimensions
W392 × H110 × D122mm

KIOSK Peripheral Devices Testing Service

A Testing Center is located inside the show room of our HQ so that developer's intention can be more accurately and quickly reflected to the critical projects implemented by client(s), allowing such client(s) to simulate and manipulate the devices inside the center. Reservation is required for the service. Please check the device information beforehand.

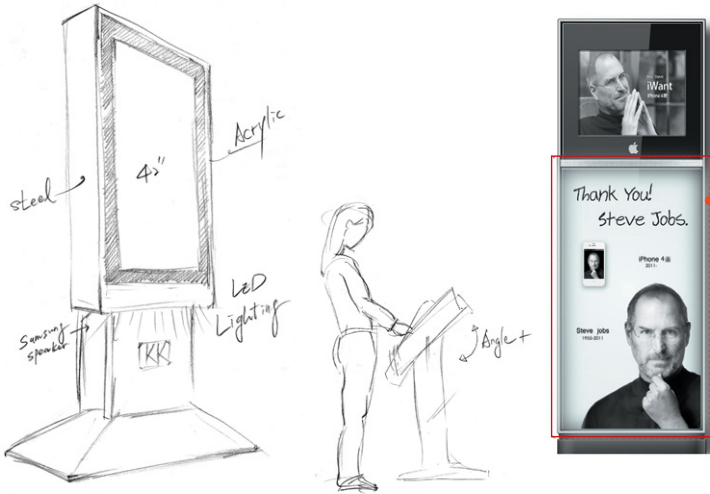

33 A/S centers under operation in 27 cities through out the country

We quickly solve any failures that may occur during the operation at our Service Centers.

We classify the failures into detailed categories by class to adopt varying procedures, which allows us to realize efficient, prompt responses to failures, satisfying our clients. Our professional maintenance team applies its best know-how in the relevant field to minimize the failures as much as possible. Regular inspection and maintenance are carried out along with thorough services to maximize work-efficiency and to reduce inefficiency regarding the task given, ultimately to prevent any failures that may be generated as clients use the KIOSK System.

Do you need a specially-designed KIOSK with the minimum development cost? We offer you with a scientific process.

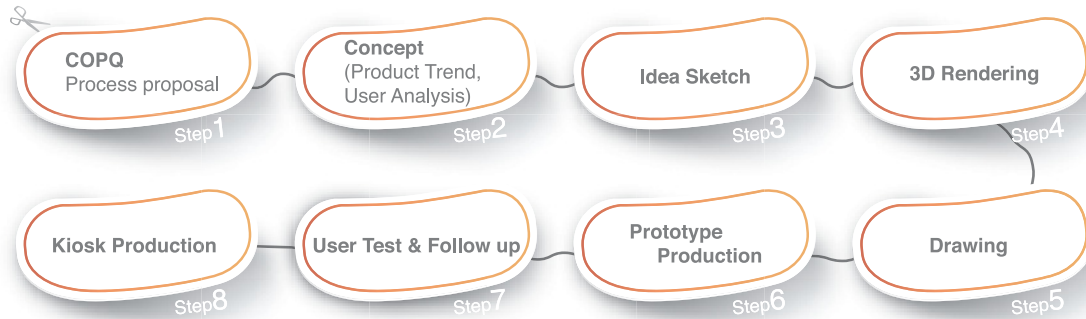

K-KIOSK prevents non-productive COPQ (Cost of Poor Quality) at the product design/development stage, reduces any waste of time, cost and materials, improves trial-and-error and proposes an objective and scientific process in decision-making after the design concept is deducted, which is the most significant design actualization stage among the design process stages. We offer you with a sustainable, yet creative design process by measuring and verifying the validity and performance improvement against the conventional processes.

• Cost of Poor Quality!!

Any additional cost arising from low product quality, in other words, any hidden cost owing to an unexpected event at the KIOSK development stage shall be revealed.

Proposition of the KIOSK DESIGN Process

2011 New Model MODEL **K24S**

This model is a slimmer design of the previous KS24 model, which is redesigned and manufactured to be installable at a very limited space. In particular, it is made of a standardized 1.6mm CR-steel material and powder-coated to improve its durability. It is an independent type KIOSK model that stands out for its elegance and sophistication. This product is able to mount a 19" touch monitor, and its inner is designed to be able to be installed with a bare born PC and slim PC. In addition, the inner is also expanded to install various types of devices including a thermal printer, a RF reader, a barcode scanner and a MCR.

▶ 19" Size : 1768(h)×360(d)×530(w)mm 

MODEL **K15** 2009 New Model

K15 model is a KIOSK terminal manufactured with a 1.6mm CR-steel material and liquid-coated that shows excellent gloss. It has a space to install a slim PC as well. K15 is equipped with an innovative metal cabinet closure, and it is designed to add dignity as stainless steel side poles are installed. Other optional devices can be selected by users, upgrading the model.

▶ 19" Size : 1550(h)×450(d)×480(w)mm 

2010 New Model MODEL **K17**

K17 model is a KIOSK terminal manufactured with a 1.6mm CR-steel material and liquid-coated that shows excellent gloss. It has a space to install a micro-ATX PC. K17 is famous for its innovative metal cabinet closure, and other optional devices can be selected by users, further upgrading the model.

▶ 19" Size : 1530(h)×375(d)×530(w)mm 

K-KIOSK MODEL

MODEL **KS25**

KS25 model is a slim-designed, independent-type KIOSK model that is made of a standardized 1.6mm CR-steel material and powder-coated to improve its durability, making it more sophisticated and elegant.

► Monitor product size is determined according to the specifications

MODEL **KW19**

KW 19 model is designed by taking an ATM machine as a motive which is easily accessible every day, and it is relatively smaller in size for it is 1480mm in height, manufactured to be useful to a wide range of users. Its Bottom Panel is designed to be as flat as possible for the convenience and movement of users.

► 19" Size : 1480h)×570(d)×560(w)mm

MODEL **K22 / BP**

K22 is an advanced model made of a standardized 1.6mm CR-steel material, and liquid coated. It is designed to be noticeable as it stands out and is more aesthetic for it is attached with a LED lamp and acryl accessories at the front part. Depending on the client's requirements, a LED touch panel ranging from 22" to 42" can be installed, and the inner is designed to allow installation of a slim PC requested by the client. This model can also be purchased with immediacy.

► Monitor product size is determined according to the specifications

MODEL **K27**

K27 model is a KIOSK terminal manufactured with a 1.6mm CR-steel material and liquid-coated that shows excellent gloss. It has a space to install a micro-ATX PC. K27 is famous for its innovative metal cabinet closure, and other optional devices can be selected by users, further upgrading the model.

▶ 19" Size : 1450(h)×380(d)×530(w)mm 

MODEL **KY22**

K22 is an advanced model made of a standardized 1.6mm CR-steel material, and liquid coated. It is designed to be noticeable as it stands out and is more aesthetic for it is attached with a LED lamp and acryl accessories at the front part. Depending on the client's requirements, a LED touch panel ranging from 22" to 42" can be installed, and the inner is designed to allow installation of a slim PC requested by the client. This model can also be purchased with immediacy.

▶ 22" Size : 1620(h)×560(d)×561(w)mm 

MODEL **KL57**

KL 57 model is designed and manufactured to be used under a wide range of conditions, which is made of a 1.6mm CR-steel and liquid-coated. Furthermore, there is a space inside the model to install a slim, industrial or bare bone PC.

▶ 19" Size : 1387(h)×440(d)×520(w)mm 

K-KIOSK MODEL

MODEL **K17C**

K17C model is a KIOSK terminal made of a 1.6mm CR-steel and is powder-coated to improve its durability, equipped with a space to install a slim PC. K17C is characterized for its profound taste added to the design as molded side poles are installed, and an optional LED lamp is attached to the lower section so that it can be used depending on its installation location. It is further upgraded since various optional devices can be selected unlike the previous K17 model.

▶ 19" Size : 1550(h)×450(d)×480(w)mm 

MODEL **KRT-70**

KRT-70 model can be placed on a shelf, a table or a desk, which can be applied as various types of KIOSK including the Factory Automation System, the Business Automation System or POS System. Basically, it is made of a 1.6T CR-steel and equipped with a space to mount a wide range of devices such as a barcode scanner, a card reader and RFID. Especially, it is installed with a sliding door to insert a mouse, making it a convenient business system.

▶ 19" Size : 920(h)×400(d)×550(w)mm 

MODEL **KRI 75·77** Industrial KIOSK

It is a simple yet stable product designed and manufactured for the factory automation system. KRI 75 model is designed/manufactured to be water/dust-proof conforming to the IP45 standards, in order to maintain system stability under any factory conditions. Casters are fixed to the model so that it is easily movable for installation and a space big enough to install various devices including the AVR, SMPS and UPS are secured. Also, a drawer-type sliding door is installed to place a keyboard and a mouse.

▶ KRI 75 Model 19" Size : 1766(h)×450(d)×560(w)mm

Be a K-kiosk business partner right now!! Be insured your success by participating in our partnership

K-kiosk Partnership Information

Use diverse benefits K-kiosk provides for your business success.

We are sharing the business with several partners. We want to grow and develop with passionate partners in the field of technical partnership, design, plan, manufacturing, and sale. You will soon discover how we can help you with streamlining operation, expanding sale, and practicing the skill for you to enter into high-growth field.

The value to be obtained through Partner Program

If you cooperate with K-kiosk, you cooperate with industry-leading company which has better experience than one of any other information technology company.

For your offering

- *Perform more intelligent affair.
 - *Secure competitive edge
 - *Capture and obtain new insight to induce and maintain the success
- Reorganize you business by cooperating with K-KIOSK through skill obtainment, business, and customer satisfaction.
K-kiosk compensates for your investment through the higher-value support.

Membership level

It is a systematic framework providing useful benefit to help with partner's business success and make mutual relation more close. We can improve partner level by proving success and obtaining the point through platinum partner, certified partner.

- * Expertise test, business and skill certification
- * Profit creation
- * Present success cases
- * Obtain a high level of customer satisfaction

Thank you for being interested in our K-kiosk partnership program.

Please fill in the application for admission and present us the outline of you and your company.
Thank you for choosing K-KIOSK.

Inquiry e-mail for partnership ; kkiosk2000@gmail.com
